		Examiner		Art Unit				
		Charles L.	Patterson, Jr.	1652				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)⊠	1)⊠ Responsive to communication(s) filed on <u>02 June 2005</u> .							
2a)⊠	This action is FINAL . 2b) This action is non-final.							
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1652

Claims 5 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is confusing and incorrect in the recitation of "(SEQ ID No. 1", which should be "(SEQ ID NO:1)". It is noted regarding this claim and claims 11 and 15 that the correct nomenclature is "SEQ ID No:", not "SEQ ID No.". This correct nomenclature is used in claims 13 and 22-27. The nomenclature used should not only be correct but consistent between the claims.

Claim 20 is indefinite and confusing in the recitation of "comprising administering to a subject in need of a protein of claim 1 to said subject". This recitation does not make any sense. Changing the recitation to "comprising administering to a subject in need of a protein of claim 1 the said protein" or some similar recitation would overcome this rejection.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 13 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is repeated for the reasons given in the last action. Applicants arguments have been carefully considered but do not overcome the instant rejection.

Applicants argue that they are enabled for claims drawn to 80% homology citing the specification teaching purifying hyaluronidases, polynucleotide

Art Unit: 1652

sequences and sequence engineering. They further refer to Exhibit 2 that apparently shows that SEQ ID NO:7, 1 and 5 have 94%, 96% and 97% homology to SEQ ID NO:3. This just further confirms the examiner's previous statement that "[i]n order to allow for allelic variants the examiner will allow claims drawn to 95% homology". These 4 sequences are apparently allelic variants and fall generally within the range of 95% homology. Since applicants show that SEQ ID NO:7 has only 94% homology to another allelic variant, the examiner will allow "94% homology" in claim 13.

Claims 1-4, 6-12, 14-17, 19 and 21-27 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Patterson, Jr., PhD, whose
